The Latest in TV Technology

DynaLight® Dynamic Backlight Control uses advanced technology to monitor brightness and automatically adjusts backlight intensity. Our new Dynamic Picture Mode creates the right amount of "pop," and lets you see more colors, finer details, less visual noise and brighter, realistic pictures.

Audyssey® Sound Enhancement

Dynamic EQ® technology is set automatically to improve sound quality through special algorithms, and Audyssey® Bass Extension uses sophisticated driver analysis and low-frequency monitoring to extend the range and bass.

Versatile Connectivity

Offering a full jack pack of connections, this TV makes it easy to plug in to other devices and broaden your entertainment options.

Gaming-Optimized Performance

It comes with a Gaming Mode that reduces frame delays between the display and controller.

Say goodbye to standard-def with 720p HD resolution

DYNALIGHT
